

NORDIC AEROWASH 8000

eco drive

KEY BENEFITS

- Washing speed: 30 square meters per minute
- Reduces the need for personnel
- Reduces maintenance ground time
- Green design – battery-powered!
- Extra safety features
- Protects the aircraft from damage caused by manual wash
- Easy-to-handle control module and user-friendly computer-controlled touch screen

TECHNICAL INFORMATION

- Propulsion speed: 15–48 meters per minute
- Dimensions: Length = 4.0 meters, Width = 2.6 meters, Height = 1.2 meters
- Fully extended height = 8.0 meters
- Main power plant: Electric engine 48 Volt
- Battery pack: 48 Volt 800 Ah
- Main hydraulic tank: 240 liters
- Main tank: 500 liters
- Working pressure: 150 bar
- Elevation range of brushes: 8 meters
- Weight: Total 4.4 ton, net 3.8 ton

The Nordic Aerowash 8000 washes any narrow-bodied and smaller wide-bodied aircraft in a very cost-effective and safe way. The battery-powered machine meets all the current environmental standards for external washing and it complies with upcoming regulations prohibiting combustion engines in hangars.

The maneuverability of the machine is outstanding. The large brushes provide an excellent washing result and they are supported with a very flexible arm, which reaches to the most inaccessible parts of the aircraft body. The machine is powered by strong, long-lasting batteries, which makes it completely environmentally friendly.

The Nordic Aerowash 8000 comes with a customized washing concept, implementation and training.
