- Drain pipe length: 5 meters

Mobile **Nordic Lavatory Service Trailer** can empty the most inaccessible wastewater tank. The light flexible trailer moves easily between railway tracks. A highly effective filter guarantees a completely odor-free emptying. The environmentally friendly diesel engine operates a whole 17 hours on one fill.

The trailer can also be used for filling with fresh water. With **Nordic Fresh Water Trailer** you take water to the train, not the opposite. This cost-effective product is able to deliver up to 100 liters water per minute.

Nordic Fresh Water Trailer and Nordic Lavatory Service Trailer can also be modified according to your special needs. Nordic Ground Support Equipment has extensive experience in supplying cost-saving support equipment for trains and aircraft.
