

Nordic GSE wins Finnair contract

Finnair has chosen Nordic Ground Support Equipment to perform external aircraft cleaning for the fleet at Helsinki-Vantaa Airport, Helsinki. The task will be performed with a new, unique aircraft washing machine, Nordic Aerowash 8000.

The Nordic Aerowash 8000 washes any narrow-bodied and smaller wide-bodied aircraft in a very cost-effective and safe way. Kimmo Kuronen, Senior Technical Manager at Finnair Technical, is very pleased with the equipment:

“Finnair’s quality requirements are high, and we feel that Aerowash 8000 fulfils high external washing standards. Aerowash 8000 is by technology good and of high quality. The equipment meets the requirements that any airline places on reliability and efficiency of maintenance performance. Aerowash 8000 reduces ground maintenance time needed for external washing by adding work efficiency and quality”.

Jules Lajola, Managing Director of Nordic GSE, is very proud to have Finnair as their customer.

“We at Nordic GSE value our co-operation with Finnair and the spirit we have generated together for developing external maintenance processes with a fresh perspective of applying modern technology to meet the expectations of maintenance cost efficiency and high product quality. We share our customers’ goals and we are very pleased to be able to offer Finnair a solution they find truly valuable.”

About Nordic GSE

Nordic Ground Support Equipment offers mobile ground support equipment for train, aircraft and other industries worldwide. Founded in 2008, the company offers cost-efficient, environmentally friendly and innovative solutions.

The product portfolio is based on decades of research and development in close cooperation with customers. Our head office is located in Solna, Sweden, and we have representatives in various parts of the world.
